

COTSWOLD COUNTRY HOUSE

This Cotswold home exemplifies contemporary architectural brilliance, nestled amidst its own Victorian walled garden.

With over 900m² of living space, separate annexe, and provisions for a basement swimming pool, this modern masterpiece provides a luxurious elegant home in the heart of the Cotswolds.

After purchasing the property, the owner contacted PFS to design and install an intruder alarm system to increase security and offer peace of mind for the inhabitants. Following a site survey, and taking into account the high-end nature of the interior, our designers specified Ajax's wireless Baseline range. This would not only provide the necessary level of protection, but also minimise the aesthetic impact, integrating discretely with the property's minimal design.

"Once again, I am very proud of our design & installation team. Understanding the architectural and interior design intent, the solution is in keeping with the aesthetics of the property, whilst being robust and simple for our valued client to operate."

Matthew Harrison (PFS Managing Director)

PROJECT SUMMARY

BUILDING TYPE

Country house

REQUIREMENTS

To design and install an intruder alarm system, sympathetic to the high level of detail and finish

TECHNOLOGY

- Ajax CombiProtect Jeweller sensors
- Ajax DoorProtect Jeweller contacts
- Ajax Hub Jeweller control panel
- Ajax StreetSiren Jeweller alarm sounder
- Ajax KeyPad Plus Jeweller
- Ajax 24/7 alarm monitoring
